ROOT CAUSE ANALYSIS

The Root Cause

A **domino effect** triggered by a single strategic gap: the absence of a workforce upskilling plan during technology adoption.

01

The Catalyst

New FinTech Adoption

Rapid deployment of new financial technologies—digital banking platforms, AI-driven credit scoring, automated compliance tools—without a parallel workforce readiness strategy.

02

The Gap

No Upskilling Roadmap

Employees feel incompetent with new tools. Without structured training, confidence erodes and the skills gap between workforce capability and technology requirements widens.

03

The Result

60% Engagement Collapse

Employee engagement drops to a critical 60% as workers feel left behind. Disengagement cascades into missed performance targets, increasing pressure across all levels.

04

The Crisis

20% Manager Churn

Mid-level managers bear the full weight of implementation stress—accountable for results but lacking resources. This drives a devastating 20% churn rate in the organization's most critical layer. Assuming ~500 mid-level managers, this equals 100 departures per year.

Core Insight

Technology alone cannot drive transformation; people capability must evolve in parallel with the tools they are expected to use. The absence of a structured upskilling roadmap created a compounding crisis that is now costing the organization its most experienced talent.

PROBLEM PRIORITIZATION

Where to Intervene First

1 ⚡ **Skills Gap** TOP PRIORITY
Fintech Readiness
Impact **High** · Urgency **High**

2 ↘ **Manager Turnover** TOP PRIORITY
Mid-Level Churn (20%)
Impact **High** · Urgency **High**

3 ⌚ **Low Engagement**
Employee Score (60%)
Impact **Medium** · Urgency **Medium**

→ KEY INSIGHT

Primary focus must be on **closing the fintech skills gap** and **stabilizing mid-level leadership**, as these drive both turnover and engagement decline.

STRATEGIC INTERVENTIONS

Our Three-Pillar Strategy

A coordinated intervention targeting skills capability, talent intelligence, and leadership resilience, simultaneously.

01

Solution Pillar 1

Fintech Upskilling Pipeline

Implement a 6-month intensive training program for the top 20% of "high-readiness" employees, creating a certified talent vanguard to lead the digital transition.

- ✓ Partner with leading digital bootcamps for fintech certifications

High-readiness = employees scoring in the top quartile on a digital aptitude assessment (combining learning agility and current tech proficiency).

- ✓ Focus on modern financial systems, digital banking & compliance tools
- ✓ Target the top 20% of high-readiness employees in Cohort 1
- ✓ Phased rollout to all 5,000 employees over 18 months

Allocated Budget

IDR 900 Million

45%

02

Solution Pillar 2

Talent Match Intelligence

Deploy a data-driven "Success Formula" to identify high-potential employees for internal mobility, reducing misfit cost and creating clear performance differentiation across talent tiers.

- ✓ Statistical scoring using Self-Efficacy (SEA) & Stakeholder Focus (CEX)
- ✓ Predict which employees will excel in the new tech environment
- ✓ Create clear performance differentiation between talent tiers
- ✓ Reduce misfit cost through evidence-based internal mobility

Allocated Budget

IDR 500 Million

25%

03

Solution Pillar 3

Managerial Empowerment & Retention

Launch a "Managerial Retention Protocol" that ties performance bonuses to team engagement scores and provides leadership coaching focused on navigating technological change.

- ✓ Performance bonuses directly tied to team engagement scores
- ✓ Leadership coaching focused on Change Management methodology
- ✓ Help managers lead disengaged teams through the tech transition
- ✓ Build a resilient, supported mid-management layer

Allocated Budget

IDR 600 Million

IDR 900M

Upskilling & Technical Training

- Digital bootcamp partnerships & licensing
- Fintech certification programs (500 initial trainees)
- 6-month intensive training cohort operations

30% of budget

IDR 600M

Managerial Retention & Coaching

- Engagement-linked performance bonus pool
- Change Management leadership coaching program
- Executive resilience & facilitation workshops

25% of budget

IDR 500M

HR Analytics & Digital Infrastructure

- Talent Success Formula scoring engine
- Real-time engagement monitoring dashboard
- Predictive attrition analytics platform

FINANCIAL SIMULATION

HR Investment Impact Simulation

Turnover Reduction Scenario

Estimating financial impact of reducing employee turnover through targeted HR interventions

6-Month Execution Plan

01

Month 1

Discovery & Assessment

- Skill gap analysis across all 5,000 employees
- Identify high-readiness employees for Cohort 1
- Define success metrics and baseline KPIs

02

Month 2 – 4

Execution

- Launch fintech upskilling program (500 trainees)
- Deploy talent scoring model & HR dashboard
- Begin managerial coaching sessions

03

Month 5 – 6

Optimization & Evaluation

- Track KPI improvements vs. baseline
- Adjust training content based on outcomes
- Evaluate retention impact & ROI

Month 1

Talent segmentation completed

Month 3

50% training completion

Month 6

KPI evaluation & ROI review

Success Metrics

Total KPIs Tracked
across 3 pillars

Primary Target
certification rate

Turnover Goal
manager churn (from 20%)

Engagement Goal
employee score (from 60%)

STRATEGIC SUMMARY

Conclusion & Strategic Impact

A targeted, evidence-based program to transform ABC Corporation's workforce into a competitive advantage in the digital banking era.

💡 3 KEY TAKEAWAYS

01

Close the Fintech Skills Gap

Closing the fintech skills gap is the highest-impact intervention, directly enabling the technology transition and reducing capability-driven attrition.

02

Retain Mid-Level Managers

Retaining mid-level managers stabilizes execution and culture. Manager turnover is the single greatest multiplier of team disengagement and productivity loss.

03

Embed Data-Driven HR

Data-driven HR enables measurable and scalable impact, shifting HR from a cost center to a strategic lever with clear accountability.

FINAL STATEMENT

With a targeted **IDR 2 Billion** investment, ABC Corporation can reduce turnover, improve engagement, and accelerate its transition into a **digital-first bank**.

CALL TO ACTION

Initiate a 30-Day Discovery Phase to validate assumptions and begin implementation.
